SUBJECT	Radar Procurement and Installation, North China NO. OF PAGES 2
PLACE	25X1A
ACQUIRED	NO. OF ENCLS.
DATE OF INFO.	25X1X SUPPLEMENT TO REPORT NO.
1.	The Chinese Communication
	The Chinese Communists were increasing air defense preparations throughout North China, East China, and Central China. Instructions have been given to purchase and import radar sets from abroad and importers have been authorized to pay extremely high prices for them. During May 1951 the Purchasing Department of the North China Hilitary Area bought more than thirty radar sets, which were imported by way of Tientsin. Some of these
	were allegedly war surplus supplies purheased in Hong Kong and smaggled to Tientsin by way of Hacao. There were three types of radar sets: one has a range of thirty miles, one 60 miles and one 90 miles. Another consignment is to be delivered within three months.
	There are radar sets along the China-Korea border at the following places: Chian (126-10, 11-07), Kuantien (124-16, 10-14), Antung, Hsinchin (新金), and Yingk'ou. There are radar sets along the railway lines in the Northeast Hilitary Area as follows: Angangch'i (123-16, 17-09), reian (北海), Chianussu, Harbin, Kirin, Changchun, Ssup'in chich, Hukden and Chinchou.
	These radar sets are not uniform in type, including Soviet made apparatus as well as others made in England and the United States.
3. (One wodel of a radar set originating in England has the following specifications:
	lodel : AP 262 Range : 90-60-30 miles Decument Ne

- 4. One AP262 Model radar set was being installed in Yangliuching (117-00, 39-00), South of Tientsin. This machine was brought to Yangliuching in a truck. The shipment consisted of ten packages weighing 2,400 pounds. Other racar sets were shipped away from Tientsin, three of which were sent to Shangtung for setting up in Tsinghao and Chefoo.
- 5. Up to mid-July none of the radar sets ordered from abroad had been imported by way of Tientsin.
